# Zowe Documentation Viewer

# Goals

1. Implement a documentation viewer application and make it ready to be added in the API catalog.

2. Show all available plugins.
   a. A plugin may have a variety of documentation with them:
      i. Readmes
      ii. Licenses
      iii. Guides
      iv. API documentation and more.
   b. Various types of documentation generally resides in file formats that browsers can visualize, be it JSON or text or markdown.

3. A standard viewer & standard packaging scheme to show the documentation.
